

Nguyen Duc Thinh

(84+) 394 940 599 | cbl.thinhnguyen@gmail.com | thinhnguyendev.id.vn | github.com/Thinkj07

Computer Science student at HCMUT with a strong foundation in software engineering and algorithms. Experienced in building Full-stack applications and game. Eager to apply technical expertise to a professional team and accelerate growth in a real-world environment.

EDUCATION

Ho Chi Minh City University of Technology (HCMUT-VNUHCM)

Bachelor of Engineering in Computer Science

Dong Hoa Ward, HCMC

Aug 2023 – Present

- **GPA:** 3.2 / 4.0
- **Relevant Coursework:** Data Structures and Algorithms, Mathematical Modeling, Database System, Software Engineering, Introduction to Artificial Intelligence, Game Programming.

EXPERIENCE

Amazon Web Services Vietnam

Cloud Engineer Intern – First Cloud AI Journey (FCAJ)

Sai Gon Ward, HCMC

Jun 2026 – Aug 2026

- Acquired solid foundational knowledge of core AWS services and cloud architectural best practices.
- Architected and deployed a resilient, fault-tolerant Multi-AZ cloud infrastructure on AWS (VPC, EC2 Auto Scaling, RDS Multi-AZ, ALB) for an e-commerce backend system.

PROJECTS

ITWorks | *JavaScript, Node.js, Express, React, MongoDB* | [GitHub](#)

Sep 2025 – Dec 2025

- Developed a full-stack job platform using MERN stack with JWT authentication and role-based access control.
- Built core recruitment features including advanced job filtering, application tracking, and Cloudinary integration.
- Engineered an Admin Dashboard with audit logging and data visualization using MongoDB aggregation pipelines.
- Designed a responsive UI with reusable React components, Zustand state management, and API pagination.

AIoT Smart Home | *Python, React, PostgreSQL, OpenCV* | [GitHub](#)

Jan 2026 – May 2026

- Architected a full-stack AIoT platform with async RESTful APIs, RBAC, and real-time device control.
- Engineered a high-throughput backend using FastAPI and PostgreSQL for telemetry ingestion and audit logs.
- Implemented Face ID authentication using OpenCV YuNet & SFace with cosine similarity matching.
- Built a responsive React and Tailwind CSS dashboard with real-time sensor charts and device management.

Perfume E-Commerce | *React, TypeScript, PostgreSQL, AWS* | [GitHub](#)

Jun 2026 – Aug 2026

- Built a full-stack e-commerce system (React, TypeScript, Node.js, PostgreSQL) with JWT/RBAC security, dynamic multi-tier catalog filtering, and an Admin Dashboard.
- Deployed a highly available AWS Multi-AZ infrastructure utilizing public/private VPC subnets, Application Load Balancer, EC2 Auto Scaling, and PostgreSQL on RDS Multi-AZ.
- Accelerated content delivery and secured web traffic with CloudFront, S3, and AWS WAF; authored an end-to-end hands-on workshop guide on GitHub Pages.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, SQL, HTML/CSS.

Frameworks: React, Express, Node.js, Tailwind CSS, Bootstrap.

AI Tools: Cursor, GitHub Copilot, Gemini.

Developer Tools: Git/GitHub, VS Code, LaTeX, Docker, AWS.

Libraries: Pandas, NumPy, Scikit-learn, Mongoose, Zustand, EmailJs, Canvas API.

ACTIVITIES

MIWAI 2025: Served as a Program Assistant for the 18th International Conference on Multi-disciplinary Trends in Artificial Intelligence.

Social Responsibility: Actively participated in humanitarian blood donation drives, contributing to community healthcare and social welfare.
